

# THE NEW STANDARD IN & TRAINING INSTRUCTION.

## RVP COMBINES:

**TECHNOLOGY** A state-of-the-art video analysis system.

**PROFESSIONAL MODELS** MLB, NPF and Olympic models. All models contain multiple views that are shot from consistent angles for complete and accurate comparisons.

**TERMINOLOGY** Consistent vocabulary helps players and coaches stay on the same page.

**INSTRUCTION** Access to hundreds of years of experience consolidated and delivered by the top coaches in the country.

“The RightView Pro Instructional System is simply the best teaching tool on the market...This product has helped me refine my approach to hitting instruction and is a must for any coach or player who wants to be his/her best. One of the best things about this product is that now when I go on the field, the students know exactly what I am talking about.”

## IN THE LAST 4-YEARS, NO OTHER COMPANY OR PRODUCT HAS HAD A LARGER IMPACT ON BASEBALL AND SOFTBALL INSTRUCTION THAN RIGHTVIEW PRO.

Champions, both professional and amateur can attest to its popularity and success. It is the only licensed product that allows players to capture their swings and pitching motions and compare them side-by-side with the best players in the game. While there are hundreds of hitting and pitching instructional videos on the market, none of them provide the proof, credibility and the tools to communicate more effectively than RightView Pro. It's an invaluable tool for any coach to manage or organize a team's entire hitting and pitching program. It delivers "Real Hitting... Real Pros... Real Results."

RightView Pro delivers the most complete set of training systems for softball and baseball. Our products are built for all ages and help players focus on what all the great players do. Every step of the way, RVP defines the principles that make the great players more efficient and successful, while communicating it in an easily understood fashion.

### **RIGHTVIEW PRO:**

#### **Provides A More Efficient Way To Teach**

Studies show that students retain about 10% of what they read, 20% of what they hear, 30% of what they see, 50% of what they both see and hear and 70% of what they feel and experience.

RVP systems utilize these communication methods to optimize the learning experience. It's just faster to show than to explain. Students match what they feel to what is real and make adjustments quicker and easier with longer lasting results. Analogies and drills are also provided to help the student understand and work on his or her individual needs.

#### **Identifies The Cause Of Problem Spots**

Most players realize when they roll over or pull off the ball, but the key to improving is identifying the cause. RVP systems are designed to step through the motion at 60 fields per second (twice as many frames as a normal video) to isolate and identify the first cause of the problem. Often if you fix the first thing that goes wrong, it will solve a variety of symptoms that show up later in the motion.

#### **Provides Proof And Credibility**

It is very difficult to teach wrong or mislead a student when using RVP because the definition is on the screen. RVP's library of professional hitting and pitching models provides a great resource to reference, challenge or prove instruction. Quickly reference any question by pulling up professional examples and see how the pros do it.

#### **Keeps It Simple For Coaches And Players**

RVP keeps instruction simple by focusing on one principle at a time. Our product's easy-to-use interface makes it easy to capture, load and compare players' motions—without the need for any special computer skills.

#### **Provides A Consistent Language**

By the time players reach high school they have had up to five different coaches with different styles and terminology. RVP helps players assimilate all this instruction into a consistent message with common terminology.

## **THE ADVANTAGES**

*“The question is not what you do differently from any one major league player but what do you do differently from all the best players in the game. What makes those players more efficient and more successful? RVP lets you see the common principles that make these players the best in the game...see yourself next to the best in the game.”*

**DON SLAUGHT**  
RIGHTVIEW PRO PRESIDENT

## THE PRODUCT

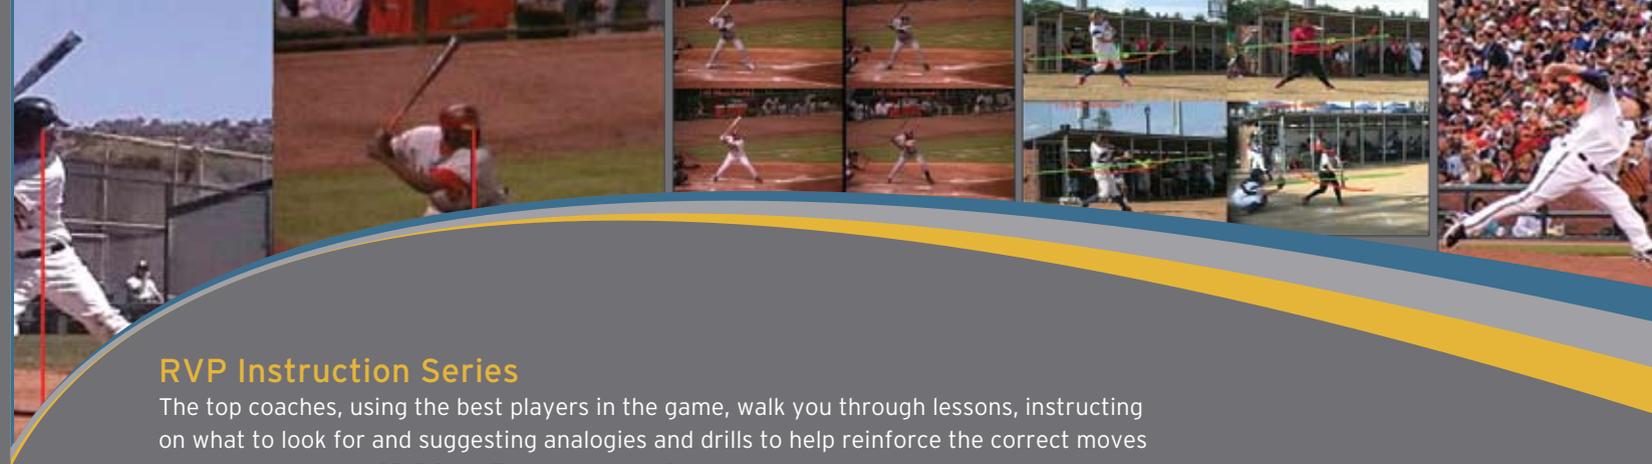

RVP offers a complete range of products for every level of instruction. Our products are modular, so they can be added to each other to customize your system for your sport and skill. All you need is a PC and a digital camcorder to get started. Then, follow these steps in choosing the system that best fits your team's individual needs.

- 1 Choose from three levels of video analysis systems.
- 2 Pick the instruction for your sport and skill.
- 3 Choose the professional models for your sport.

### Video Analysis Systems

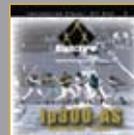

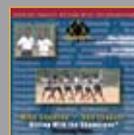

Choose from three levels of video analysis systems. All these products provide the tools you need to capture, compare and measure your players against the pros.

ANALYSIS SYSTEM	FOR	FEATURES
 <b>THE BASIC SYSTEM</b> MODEL CV300	Home or Youth Coach	A great video analysis system for the home or youth coach. You will be able to synchronize and compare your players' motions with today's top players on your PC. Using RVP's analysis tools, you can quickly pinpoint the inefficiencies in the swing or pitching motion.
 <b>THE ADVANCED SYSTEM</b> MODEL CE300	High School Teams or Teams that train on a regular basis	It contains all of the Basic System's features and includes some exciting features like auto-capture, auto-naming and auto-programming, allowing for real-time instruction. It's also over 15x faster and contains a more sophisticated easy-to-use database that organizes your coaches, players and their video clips for instant access.
 <b>THE PROFESSIONAL SYSTEM</b> MODEL IS300G	Colleges, Professional Teams, Training Facilities and Camps or Clinics	Used by World Series Champs like the Boston Red Sox, as well as the U.S. Olympic Fastpitch Softball Team just to name a few. This system provides all the features and flexibility needed for colleges, professional teams, training facilities and organizations that run camps or clinics. Users can not only create training videos and personalized lessons for students, but also generate revenue, advertise, organize a camp or clinic and make powerful presentations. It also adds some speed and versatility with more advanced analysis tools like auto bat path drawing, two overlay modes and full screen mode to name a few.
 <b>THE PLAYER VIEWER</b> MODEL PV300	Students of the Professional System	The student's own personal video analysis system complete with all the drawing tools and view modes. It enables the student to bring his/her lessons, drills and motions home for analysis, thus optimizing learning time for both coach and student. <i>*The Player Viewer does not have capture capability.</i>

### RVP Instruction Series

The top coaches, using the best players in the game, walk you through lessons, instructing on what to look for and suggesting analogies and drills to help reinforce the correct moves in these interactive CD-ROMs. The Instruction Series are designed to work as stand-alone programs or integrated into the Video Analysis Systems.

ANALYSIS SYSTEM	FEATURES
 <b>INSTRUCTION PLAYER ALL-STAR BASEBALL</b> MODEL IP300-AS	This interactive tool takes the controversy out of hitting by defining the mechanics of hitting with video examples of the game's best hitters. Don Slaught, former Major League Player and Coach, walks the user through the analysis of the swing: defining the key principles, explaining why they are important, and illustrating and giving analogies to help players understand and improve.
 <b>INSTRUCTION PLAYER FASTPITCH PITCHING</b> MODEL IP300-FP	Lisa Fernandez, one of the greatest softball pitchers of all time, and Kirk Walker, head coach of Oregon State, have teamed up to produce a dynamic series of 47 lessons to define the principles of Fastpitch pitching.
 <b>INSTRUCTION PLAYER SOFTBALL HITTING</b> MODEL IP300-SB	This interactive CD-ROM presents the RVP hitting approach, philosophy and terminology with easy-to-follow examples and 89 helpful lessons from Mike Candrea, U.S. Olympic Head Coach and Head Coach of the University of Arizona and Sue Enquist, 11-time National Champion and former Head Coach of UCLA. They explain what they look for and the importance at each key position in the swing, and then provide drills that help reinforce the correct moves.
<b>COMING IN EARLY 2008</b> <b>INSTRUCTION PLAYER SOFTBALL HITTING</b> MODEL IP300-SB08	Two premier coaches Mike Candrea and Sue Enquist provide solutions to common problems, drills and insight for coaching at all levels.
<b>INSTRUCTION PLAYER BASEBALL HITTING</b> MODEL IP300-AS08	Don Slaught walks through the purpose, the set-up and the positive feel of proven drills to instruct players of all ages. Advanced lessons on adjusting to speeds and locations of the pitch are added that are useful for even the most skilled player. All-Star players' Alfonso Soriano, Brian Roberts, Carlos Beltran, Derek Jeter, Miguel Cabrera, Ichiro Suzuki and Alex Rodriguez are also added.

## System Add-ons

Stay current with latest professional models or add additional hitting or pitching models to your system.

ANALYSIS SYSTEM	FEATURES
 <b>MAJOR LEAGUE BASEBALL PITCHING MODELS</b> MODEL MLB-PM300	Add Major League pitching models to all of the RVP Analysis Systems. See your pitchers next to Roger Clemens, Greg Maddox, Curt Schilling, Jason Schmidt, Tom Glavine, Mark Mulder, Barry Zito, Randy Johnson, Eric Gagne, Kerry Wood and Mariano Riviera.
 <b>NATIONAL PRO FASTPITCH PITCHING MODELS</b> MODEL NPF-PM300	Now you can see and compare yourself with the best softball pitchers in the country: Jenny Finch, Amanda Freed, Amy Harre, Danielle Henderson, Jamie Southern, Jodie Cox, Lauren Bay, Lindsay Choinard, Peaches James and Brandee McArthur.
 <b>NATIONAL PRO FASTPITCH HITTING MODELS</b> MODEL NPF-HM300	Add 20 new models from the National Pro Fastpitch league to any of your analysis systems: Pv300, Cv300, Ce300 and Is300.
<b>COMING IN EARLY 2008</b>	
<b>MAJOR LEAGUE BASEBALL PITCHING MODELS</b> MODEL MLB08-PM300	Adds additional 15 new MLB pitching models to RVP analysis systems: Is300, Ce300, Cv300, Pv300.
<b>MAJOR LEAGUE BASEBALL HITTING MODELS</b> MODEL MLB08-HM300	Adds more than 20 additional MLB hitting models to RVP analysis systems: Is300, Ce300, Cv300, Pv300.
<b>USA OLYMPIC HITTING MODELS</b> MODEL USA08-HM300	Adds additional U.S.A. Olympic hitting models to RVP analysis systems: Is300, Ce300, Cv300, Pv300.

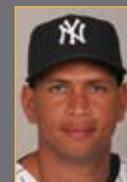

*“The RVP system is undoubtedly the best system I have seen to help identify and communicate the mechanics and the principles of the swing. All of our players have truly benefited from the knowledge and use of the RightView Pro system and the results have shown up on the field. I wish I had RVP when I played.”*

**GREG WALKER**  
 CHICAGO WHITE SOX MAJOR LEAGUE HITTING  
 INSTRUCTOR, 2006 WORLD SERIES CHAMPS

The RVP Systems use a great number of the professional players as models. To see what player models are included in a product as well as to see sample screen shots of his/her swing visit our website.

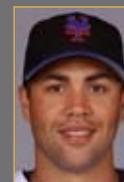

## THE PLAYERS

ALEX RODRIGUEZ

JOSH BECKETT

CARLOS BELTRAN

ICHIRO SUZUKI

DEREK JETER

ALBERT PUJOLS

MARIANO RIVERA

JOHAN SANTANA

ALFONSO SORIANO

JUSTIN VERLANDER

VLADIMIR GUERRERO

MAGGLIO ORDONEZ

With champions ranging from youth programs, high school, college, the Olympics, Professional Major League Baseball and Fast Pitch Softball teams, RVP boasts a user list that's a Who's Who of the most successful baseball and softball programs in North America. RVP has become a predominant training software of Major League Baseball, and is the official training software of the National Fastpitch Coaches Association. In fact, in 2006, seven out of the eight NCAA Softball Championship finalists were RVP users.

  - NCAA Softball National Champions: Michigan
- 2004**
  - World Series Champion: Boston Red Sox
  - Division Champion: Atlanta Braves
  - NCAA Softball National Champion: UCLA Bruins
  - USA Olympic Gold Medal Softball Team

*“Last season your program put us one out away from the State Championship. We finished 2nd in North Carolina. Amazingly the first year we had the program we batted almost 100 points higher. But last year with it we raised that another 80 points. It just keeps getting higher and higher. Thanks.”*
